O R D E R

On February 2, 1981, the Commisison issued its Order to Hickman-Fulton Counties Rural Electric Cooperative Corporation (Hickman-Fulton) directing it to submit its plan of emergency procedures to be followed during any shortage of energy for the generation of electric power. The Commission also ordered that in the preparation of the emergency procedures submitted, the Utility was to consider the appropriateness of the procedures and substance contained in Attachment No. 1, which was a part of the Order. Emergency procedures proposed by Hickman-Fulton were filed with the Commisison on February 9, 1981.

The Public Service Commission, successor to the Energy Regulatory Commission, having considered the evidence of record and being advised is of the opinion and finds:

1. That it is both prudent and desirable for a utility to have contingency plans available prior to the onset of an emergency condition; and

2. That Hickman-Fulton purchases electric power wholesale from the Tennessee Valley Authority (TVA) and distributes the power to retail customers within its service area; and

3. That the plan of emergency procedures which was submitted by Hickman-Fulton is prepared from guidelines furnished by TVA for load curtailment by electric power distributors during an emergency and therefore should be approved; and

4. That the emergency procedures proposed by Hickman-Fulton give due consideration to the public health, safety, and welfare without undue prejudice or disadvantage to any customer.

IT IS THEREFORE ORDERED that the energy emergency control plan which was filed with the Commission on February 9, 1981, by Hickman-Fulton be approved as submitted.

IT IS FURTHER ORDERED that within twenty (20) days of the receipt of this Order Hickman-Fulton shall file a tariff with the Commission which incorporates the emergency control procedures approved by this Order or shall file a new tariff sheet which makes reference to these procedures.

Done at Frankfort, Kentucky, this 7th day of April, 1981.
